PROFESSIONAL EXPERIENCE

Front End Developer

Momentum Solutions Company

📅 June 2023 - Present

- Architected and developed interactive web applications using React, enhancing digital workforce solutions.
- Built reusable, modular components and optimized applications for speed, scalability, and responsiveness across various devices.
- Partnered with UI/UX designers to create visually engaging, user-friendly interfaces, ensuring technical feasibility and offering valuable insights.
- Collaborated with back-end developers and cross-functional teams to integrate front-end components seamlessly and deliver new features.
- Participated in code reviews and implemented best practices to maintain high-quality code and enhance application performance.
- Troubleshot and debugged issues, addressing usability concerns and performance bottlenecks to improve overall user experience.
- Synthesized business needs into UX/UI design proposals and translated client requirements into technical designs.
- Stayed up-to-date with the latest React.js trends, researching and implementing emerging front-end technologies to drive innovation.

Front End Developer

Freelance

📅 Dec 2022 - June 2023

- Utilized HTML and CSS to design and develop mobile-first web pages that achieved a high performance score, resulting in faster load times for users.
- Implemented JavaScript functionality to allow for real-time updates of web page content, enhancing user satisfaction.
- Redesigned webpage layout, improving user experience and increasing time spent on site.
- Deployed Git for version control, allowing for collaborative coding and enhancing team productivity.

Retail Manager

Mahya Company

📅 Dec 2021-Dec 2022

- Demonstrated excellent customer service skills through resolving customer complaints and creating a positive shopping experience
- Reduced stock loss through improved inventory control and more accurate stock counts.
- Coordinated with sales and marketing teams to maintain consistent brand presentation in-store.

PROJECTS

My Portofolio

Created a portfolio that highlights my expertise in optimizing web performance and enhancing user experience, featuring projects where I improved page load speed.

Technologies

Git | React | Bootstrap | HTML | CSS | Sass | Javascript

Shortlisted Project

Developed a luxury e-commerce platform for Shortlisted, curating high-quality products from independent brands, with a focus on delivering a seamless and visually appealing shopping experience.

Technologies

Git | React | Axios | Bootstrap | HTML | CSS | Sass | Javascript

Oscar Project

Designed and developed the Oscar marketplace, a comprehensive platform catering to all customer needs, ensuring a user-friendly shopping experience with a wide range of products.

Technologies

Git | Laravel | Bootstrap | HTML | CSS | Javascript | Jquery

Calta Project

Developed the Calta real estate platform, offering a seamless experience for buyers and sellers with intuitive search, property listings, and user-friendly navigation.

Technologies

Git | Laravel | Bootstrap | HTML | CSS | Javascript | Jquery

Coffee Time Project

Created the Coffee Time platform, providing an engaging experience for coffee enthusiasts to explore various coffee types and learn everything about their favorite brews.

Technologies

Git | React | Bootstrap | HTML | CSS | Sass | Javascript
